Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 21,22,24 and 28 are rejected under 35 U.S.C. 102(e) as being anticipated by Lee et al. (Lee), US 6,490,291.

Regarding claims 21 and 25, Lee discloses a wireless communication terminal comprising: a controller arranged to receive an input of resource related information from another terminal, wherein the controller is further arranged to negotiate a connection with the other terminal and subsequently to receive (or send) the information over the connection (col. 5,line 14 - col. 6,line 21).

Regarding claims 22 and 26, Lee discloses a terminal as claimed in claim 21, wherein the controller operates in accordance with a Wireless Application Protocol(col. 5,line 14 - col. 6,line 21).

Regarding claims 24 and 28, Lee discloses a terminal as claimed in any one of claims 21, wherein the terminal is a cellular radio telephone (col. 1, lines 26-49).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 23 and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee, in view of Luna et al. (Luna), US 2002/0123335.

.Regarding claims 23 and 27, Lee discloses a terminal as claimed in claim 22, but fails to explicitly disclose wherein the controller is arranged to receive the resource related information via a push command.

In a similar field of endeavor, Luna discloses wherein the controller is arranged to receive the resource related information via a push command (page 2 [0017] and page 3 [0025]).

At the time of the invention it would have been obvious to one of ordinary skill in the art to modify Lee to include push technology for the purpose of initiating provisioning for enhancement of a mobile device.

Allowable Subject Matter

6. Claims 1-20 and 29-41 are allowed.
